(54) Title: EMISSION ENHANCING COATING, ARTICLE TO WHICH THE COATING IS APPLIED AND METHOD FOR AP-  
PLYING THE COATING TO A SURFACE

(57) Abstract: The invention relates to an emission enhancing coating for a surface, which coating comprises at least one electri-  
cally conductive transparent film and at least two non-conductive films, wherein the conductive and non-conductive films have been  
applied alternately on top of one another. The invention further relates to an article to which a coating according to the invention has  
been applied. Such an article is, for instance, a solar cell, light reflector or a metal foil. The invention further relates to a method for  
applying an emission enhancing coating according to the invention to a surface.
